

## RESPONSE Project Update: Dublin Highlights, Scientific Publication & New ESG Tools Available!

### Reflecting on Dublin: From Readiness to Reporting

Following our successful public event hosted by the **Dublin Chamber**, the consortium has reaffirmed its mission to provide SMEs with a practical, accessible framework for ESG disclosure. During the event, policy and industry experts explored the new **voluntary sustainability reporting standards** for smaller enterprises. These key insights are directly shaping our forthcoming **ESG+ Toolbox**, set to officially launch at the start of 2027.

### Scientific Milestone: Research Published

In an important achievement for our consortium, the results of our **Analysis of Needs and Barriers for SMEs in ESG Reporting** have been published in the **International Journal of Economics and Management Engineering**. Led by our scientific partner, Scuola Superiore Sant'Anna, this publication validates the relevance and impact of the data collected across European SMEs.

### New Resource Released: Updated ESG Tools Compendium

Alongside our research findings, the consortium has released the latest version of the **Compendium of the Main Tools Supporting SMEs' ESG Reporting**, offering an up-to-date overview of available resources designed to simplify data collection.
